

SDSSJ1051+4439

1.5''

This is a color astronomical image of the galaxy SDSSJ1051+4439. The galaxy is the central focus, showing a bright, yellowish-white core surrounded by a diffuse, blueish-green glow. A distinct, curved, and slightly elongated structure of blueish-green light extends from the upper right towards the core. The background is a deep blue, populated with numerous small, distant stars of various colors. In the bottom left corner, there is a white horizontal scale bar with the label "1.5''" above it, indicating the physical size of the features in the image.
